ELITE™ SERIES: EXPLOSIVES DETECTION & IDENTIFICATION

The ELITE™ explosives detection and identification kits are simple, reliable, robust and unique in their detection and identification of commercial, military and home-made explosives (HME):

- Model EL100-BX - a box of ten EL100 detection cards. Each disposable card can detect dozens of nitrogen-based explosives as well as bromate mixtures. It can also identify chlorate and perchlorate mixtures and HME precursors. The EL100 is currently in use with US and other NATO forces as well as police and security agencies around the world. It is known for its ease of use, long shelf life in all operating and storage conditions, robustness, sensitivity and very low false positive rate.
- Model EL240-BX - a box of ten EL240 detection/identifications pens for the peroxide-based explosives (HME) such as TATP, HMTD and MEKP. The EL240 also identifies and differentiates the peroxide-based HMEs from chlorate-based HMEs; the EL240 is the only disposable kit that can detect and identify solids as well as liquids (MEKP and hydrogen peroxide solutions). The pen-like design provides protection against static and friction-sensitive HME. The EL240 also has a very long shelf life, is robust and has a very low false positive rate.

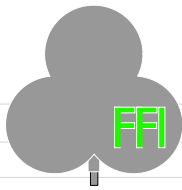

Model EL100

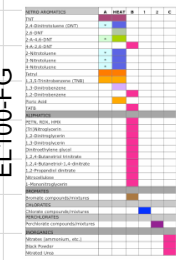

Model EL240

The ELITE™ detection kits are designed to be used in a variety of conditions and by users of different skill and knowledge levels. Currently the ELITE™ is used by forensics specialists in post-blast investigations, law enforcement and military groups in attack-the-network (ATK) operations, and by security guards screening personnel, passengers, and vehicles for evidence of explosives. The ELITE™ detection kits are available in a variety of field kits complete with ancillary devices, field guides and heating methods.

ELITE™ SERIES ORDERING INFORMATION

COMPLETE DETECTION FIELD KITS		
EL1001	Complete Field Kit. Includes: 10x EL100 (an EL100-BX), 1x Battery-powered heater and charger, 1x Heating jig for use with lighter, 1x Zippo lighter, 1x pocket Field Guide, Pelican 1400 hard-sided case.	EL1001 
EL1001-X	Same as above but with the addition of ten EL240s (one Model EL240-PK)	
EL1001-XC	Same as above but with the addition of ten CHL/PCHL tests (one Model CHL/PCH-PK)	
EL1002	Complete Field Kit. Includes: 10x EL100 (an EL100-BX), 1x Battery-powered heater and charger, 1x Heating jig for use with lighter, 1x Zippo lighter, 1x pocket Field Guide, soft-sided carrying case with shoulder strap.	EL1002 
EL1002-X	Same as above but with the addition of ten EL240s (one Model EL240-PK)	
EL1002-XC	Same as above but with the addition of ten CHL/PCHL tests (one Model CHL/PCH-PK)	
EL1003	Complete Field Kit. Includes: 10x EL100 (same as EL100-BX), 1x Battery-powered heater and charger, 1x Heating jig for use with lighter, 1x Zippo lighter, 1x pocket Field Guide, 1x belt-mounted pouch. Specify Black or ACU when ordering.	EL1003 
REFILLS AND ACCESSORIES		
EL100-BX	Box of 10 each EL100s. Each EL100 tests for all the nitrogen-based explosives as well as bromate mixtures. Can be used with the Model CHL/PCHL-PK below for chlorates and perchlorates (order separately).	EL100-BX 
CHL/PCHL-PK	Pack of 10 each chlorate/perchlorate for use with the EL100 or as stand-alone tests. Can also be packaged with EL240 peroxide tests upon request.	
EL240-BX	Pack of 10 each peroxide, chlorate and bromate tests - TATP, HMTD, MEKP, and concentrated solutions of hydrogen peroxide. Also detects and differentiates chlorate and bromate mixtures.	
EL100-BPH	Battery-powered heater and recharger. 100-240 VAC 50/60 Hz. Includes NiMH battery.	EL100-BPH 
EL100-BLH	Folding, anodized aluminum heating jig for use with cigarette lighters, etc., (in place of the EL100-BPH)	EL100-BLH 
ELITE-FG	A complete pocket field guide for the ELITE Explosives Detection System. Covers all versions and options. Printed on waterproof paper.	
EL100-FG	Field Guide as above but covers only the basic EL100 test.	
EL100-FGC	Field Guide as above but includes chlorate and perchlorates tests.	
EL240-FG	A Field Guide as above but includes only the EL240 procedure.	EL100-FG 
FFI-ZIP-10-C	FFI 2010 Logo Zippo Lighter (shipped without fuel) - chrome version	
TN-RD-TST-1	EL100 training material- inert TNT and RDX simulants - NESTT material.	 FFI-ZIP-10-B&C
